WHAT DRIVES US

Entrepreneurship is about seizing opportunities, but you don't have to do it alone. At AXP Advisors, we give you the space to focus on what truly matters: building your business, driving growth, and creating new opportunities. Let us take care of the rest, so you can fully concentrate on your ambitions.

In today's tight labor market, where expertise is scarce, we prove our value by supporting you with a dedicated team of professionals. We work with fixed account teams, ensuring that you always deal with familiar faces.

Direct communication, personal attention, and genuine involvement are at the heart of our approach. With efficient administrative processes, sharp analyses, and forward-looking advice, we help entrepreneurs achieve their goals and unlock their growth potential. AXP Advisors stands for craftsmanship and reliability, as a proud NOAB member and registered with the Register of Tax Advisors (RB). This ensures you benefit from up-to-date expertise and high-quality service.

Together, we build control over your numbers, a focus on growth, and a strong future.

SMART ADMINISTRATION, STRONG FINANCIAL CONTROL, STRATEGIC ADVICE

At AXP, we believe that numbers are not just about looking back, they provide direction for future growth. We support entrepreneurs and organizations with three powerful core activities:

Administration: Smart digitization, intelligent automation, and where possible, robotic accounting. AXP Advisors offers a complete range of financial services: from up-to-date bookkeeping and seamless tax filings to clear annual accounts, interim reports, and fully digital payroll administration, always in line with the latest legislation.

Controlling: Enabling performance and profitability through clear reporting, intelligent dashboards, and actionable cash flow insights. Even if you manage your own administration, our controllers challenge your thinking, drive improvements, and provide financial leadership as interim or part-time CFOs. Empowering sustainable growth — together with AXP Advisors.

Strategic Advisory: Guidance for growth, investment, and restructuring — from tax optimization and valuations to mergers & acquisitions. Always aligned with your business and personal goals.

TURNING DATA INTO IMPACT

DATA THAT DRIVES GROWTH

As an entrepreneur, you don't want to be caught off guard, you want to steer with purpose, seize opportunities, and stay ahead of risks. That's exactly where AXP Advisors comes in. With our process of monitoring, analyzing, simulating, and reporting, you gain access to real-time steering information, not only about where you stand today, but also about what lies ahead.

Interim reporting is not a luxury, but your navigation system on the road to results. With real-time insight into revenue, costs, and cash flow, you can adjust faster, manage margins more effectively, and apply for financing with greater confidence. Whether it's growth, restructuring, or liquidity, up-to-date figures ensure you are always in a stronger position.

Monitoring: **Seeing what others miss**

Our collaboration starts with active monitoring. We visualize revenue trends, cost patterns, and cash flows, giving you insights not after the fact, but in time to adjust course during the process.

Reporting: **From data to direction**

True insight only emerges when numbers are clearly presented. Our reports are visual, concise, and tailored, no overload of figures, but dashboards and trends you can act on immediately.

Analysis: **Understanding what truly matters**

Data only speaks when you understand it. Our analyses reveal connections, identify trends, and highlight opportunities. You see which customers are growing, where costs are increasing, and which regions deliver the strongest returns. This gives you the clarity to act decisively and drive further growth.

Simulation: **What if...**

What happens if you raise prices, cut costs, or invest in growth? With our simulations, you can safely test scenarios and explore your future before making decisions.

INTELLIGENT ADMINISTRATION

IT powering simplicity, insight and growth

Is your administration really working for you? With smart IT solutions and seamless integrations, we turn fragmented processes into efficient workflows, saving time, reducing errors, and giving you real-time insight.

What's in it for you?

- Greater oversight
- Less manual work
- Smarter decisions
- More efficient collaboration

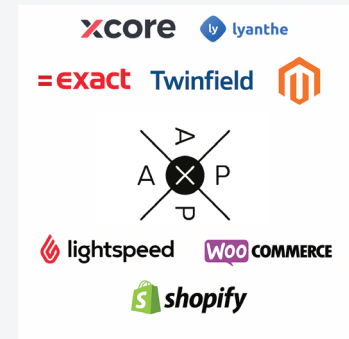

Our approach

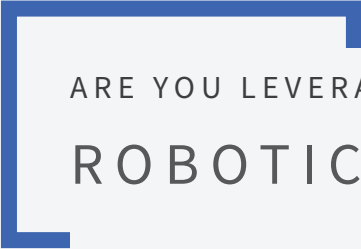

- Analysis & Advisory
- Software Selection & Implementation
- Integrations & Automation
- Guidance & Support

Ready to work smarter?

Don't let your administration fall behind, take the step toward an integrated, future-proof way of working.

Get in touch with us, and together we'll ensure you get the most out of your digital administration.

ARE YOU LEVERAGING THE LATEST INNOVATIONS?

ROBOTIC ACCOUNTING

We combine traditional expertise with innovative technology, such as Robotic Accounting.

This allows recurring administrative tasks to be fully automated, faster, error free, and cost efficient. Always up-to-date figures, securely stored, and ready for sharp financial reporting.

Robotic Accounting is ideal for:

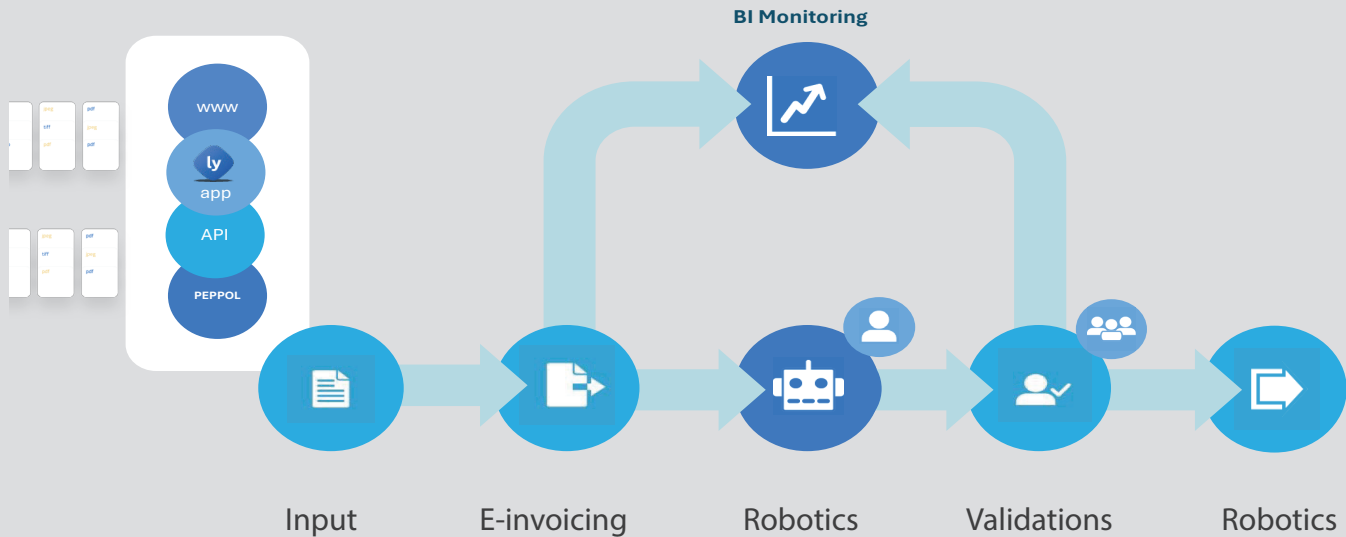

- SMEs looking to scale up
- Companies handling high volumes of purchase or sales invoices
- Organizations that value real-time insight and speed

Experience the power of Robotic Accounting.

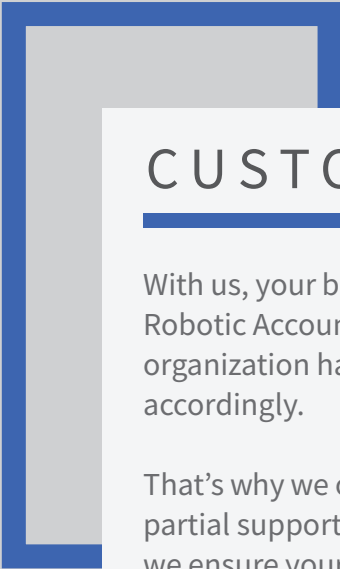

Robotic Accounting
frees your business from
time-consuming processes,
giving you more space to
focus on strategy,
analysis, and growth.

More and more large companies are choosing Robotic Accounting to automate time-consuming administrative processes and shift their focus toward strategic and analytical work.

Robotic Invoice Journey

CUSTOMIZED COLLABORATION

With us, your business or organization comes first.

Robotic Accounting is a powerful development, but we understand that every organization has unique needs and that financial administration must be tailored accordingly.

That's why we offer different collaboration models, ranging from full outsourcing to partial support, depending on what best fits your situation. Whichever model you choose, we ensure your administration is accurate and up to date, so you always have a clear view of your financial position.

In an introductory meeting, we map out your goals and challenges together, so we can determine which approach works best for you. We listen carefully and develop a solution that truly matches your organization.

Flexibility is key: together we choose the best route and adjust it whenever needed.

WHAT'S YOUR CHOICE?

- Full outsourcing of administration *)
- Partial support: you process, we review
- On-site support: working with you, at your location
- Collaboration with AXP and an audit firm for statutory audits

*) In 95% of cases, clients opt for this solution. Still, we offer several other ways of working together.

FLEXIBLE SERVICE PLANS

Exactly what your business needs

At AXP Advisors, we know every business is unique. That's why we offer four clear subscription models, from streamlined administration to real-time reporting, financial insight, and strategic advice. Prefer a fully customized setup? We'll tailor it to your needs.

Client-specific solutions

Each model is built on one promise: smart automation, efficient processes, and reliable figures as the foundation for better business. Whether you want support with administration or active guidance through reporting and strategy, you'll always benefit from clarity and meaningful advice.

Not using Exact Online or Twinfield? No issue. We convert your accounts into a uniform Reference Chart of Accounts (RGS), so you keep your preferred system while we deliver annual accounts, tax filings, and payroll to our high standards.
